PROFILE

I'm Chandan Uttharkar A, a passionate and driven developer skilled in HTML, CSS, Python, JavaScript, React and more. I love building creative and impactful tech solutions, and thrive in fast-paced, collaborative environments. I'm eager to learn, innovate, and contribute meaningfully to technology-driven projects. I'm skilled in using AI tools and prompt engineering to develop scalable and practical solutions, from rapid prototypes to full-fledged applications, with a strong focus on innovation and efficiency.

EDUCATION

Bachelor of Engineering (B.E.) — Information Science and Engineering

Expected May 2027

Sri Siddhartha Institute of Technology, Tumakuru | 7th Semester | CGPA: 7.0

WORK EXPERIENCE

Developer Intern — Chaalanikrafts Info LLP

November 2025 – March 2026

Offline / On-site Internship

- Worked as part of the production team as the sole frontend developer — responsible for frontend work and designing.
- Independently built sallt.in website — a complete frontend website for the SALLT community, live and publicly accessible.
- Served as Team Lead, mentoring and training 2 fellow intern colleagues from the same college.

PROJECTS

Tech Stack: React, NodeJS, ExpressJS, MongoDB, NestJS & NextJS

1. ExcelAI

An automation tool that reads data from Excel sheets, monitors changes, and automatically sends email updates when data changes — eliminating manual follow-ups via a React frontend and Node.js–Express backend.

2. StayNet

A full-fledged Hostel Management System with three dashboards — Admin, Warden, and Student — enabling smooth communication and management of hostel operations like student handling, requests, and administrative controls.

3. ClickNGo

An automation platform that collects user data and programmatically manages end-to-end online application workflows, including validation, submission, and acknowledgment generation, reducing manual effort. Currently under active development.

4. Patientcare+

Improves hospital communication by letting patients trigger alerts using eye and hand movements. Nurses get real-time alerts; doctors monitor vitals, history, and communicate via video intercom — enabling faster, safer patient care.

5. Portfolio

Personal portfolio website showcasing projects, skills, and work. Hosted online as a single destination for recruiters to view the profile.

Accessible at: chandanua.vercel.app

6. C_GPT – Local AI Engineering Project

A fully local AI system running entirely offline with memory, RAG pipeline, and multi-role intelligent modes. Built using a human-AI collaborative workflow — strategically using modern AI tools and prompt engineering to design, develop, and optimize the entire system end-to-end.

7. TaskTracker_CUA

A cross-platform task tracker built with React, TypeScript, Tailwind CSS, Next.js, and NestJS, with Rust powering the desktop app and Kotlin the mobile app. Node.js and Express handle the backend across web, desktop, and mobile platforms.

SKILLS & ABILITIES

C | C++ | HTML5 | CSS3 | Python | JavaScript | React JS

LANGUAGES

Kannada | English | Hindi | Telugu | Marathi

ACHIEVEMENTS & CERTIFICATES

- Selected as a Resource Person to deliver hands-on Web Development workshops to junior batches — once in 2nd year and twice in 3rd year — with a focus on practical, real-world development skills.
- Actively participated in 4–5 State- and National-level Hackathons; three projects shortlisted among the Top 10 teams, one securing 1st place with formal recognition.
- ISO 9001 Foundation Certificates — C, C++, HTML5 & CSS3, Python, and JavaScript Programming
- Internship Completion Certificate — Chaalanikrafts Info LLP (Nov 2025 – March 2026)
